WQA AQUATECH USA PRESS RELEASE

FOR IMMEDIATE RELEASE — JANUARY 13, 2011

WQA Aquatech USA calling for industrial ‘best practices’ examples Pick up tips, ideas, solutions at Industrial Water Forum/Networking event

Lisle, Illinois USA — Companies involved in industrial water treatment are being encouraged to present case studies and best practices at WQA Aquatech USA 2011 in March.

As part of the show’s “Industrial Water Forum/Networking Event,” a new program will let participants share their knowledge and expertise. Companies interested are asked to put forward case studies related to challenging water chemistry, technical problems, and other issues. The goal is to show how different businesses have approached problems.

The conference and exhibition will be held at the Henry B. Gonzalez Convention Center, San Antonio, Texas, March 8 - 11, 2011.

To learn more or participate, a downloadable brochure is available at wqa-aquatech.com.

In addition to the case study program, the industrial event will include a roundtable discussion and networking. The convention will also offer education/training sessions and AquaStages, a series of exhibition floor education/product demonstrations. Educational sessions on the trade show floor are open to all registered. Significant hands-on product training and user group sessions will also be offered.

Registration and hotel reservations are now available. For more information and to register, go to wqa-aquatech.com.
